UK king co-writes children's book on climate change – 23rd February 2023

Level 0

The UK's King Charles has written a children's book. It is called "Climate Change". Charles is an environmentalist. He speaks about the environment a lot. He hopes his book will teach children about nature. The other writer of the book wants to give children facts. He said children must find answers to climate change for their future.

Last Friday, Charles asked business leaders to help protect nature. He said he was excited because children want to help the Earth. Charles loves "the level of energy and passion [for nature] shown by young people". Charles wrote: "Ever since I was a young teenager, I have been deeply worried about...our world."

Level 1

King Charles III of the UK has written a children's book called "Climate Change". Charles is an environmentalist. He speaks about the environment at climate change conferences. He hopes his book will teach children about the problems our planet has. The other writer of the book is Tony Juniper. He is from a group called Natural England. He wants to "bring facts to the fingertips" of children. They have the most to gain by finding answers to climate change.

Last Friday, King Charles met many business leaders. He asked them to help protect nature. At the event, Juniper said Charles was excited because children wanted to help the Earth. He said Charles loved "the level of energy and passion shown by young people". Charles wrote: "Ever since I was a young teenager, I have been deeply worried about...our world. I am pleased to see that children across the world are now raising the alarm."

Level 2

A new book for children called "Climate Change" has been co-written by King Charles III of the United Kingdom. Charles is an environmentalist. He has spoken about the environment for decades. He speaks at climate change conferences. He hopes his book will teach 7–11-year-olds about the problems our planet has. The other co-writer of the book is Tony Juniper from an organization called Natural England. He said he wants to "bring facts to the fingertips" of children. He said they have got most to gain by finding solutions to climate change.

Last Friday, Mr Juniper went to an event hosted by King Charles. Many business leaders were there. Charles asked them to help protect nature. At the event, Juniper said Charles was excited to know children wanted to help the Earth. He said: "I think he's been struck by the level of energy and passion shown by young people." Charles wrote: "Ever since I was a young teenager, I have been deeply worried about the way we have shaped our world. I am pleased to see that children across the world are now raising the alarm and calling for big changes."

Level 3

There is a new book for children about climate change. The book is co-written by Charles III, the king of the United Kingdom. It is called "Climate Change". Charles is an environmentalist. He has spoken about the environment for decades. He speaks at climate change conferences all over the world. In his new book, he hopes children will learn more about the problems our planet is facing. The other co-writer of the book is Tony Juniper. He is chairperson of an organization called Natural England. He told reporters that he wanted to write a book for 7–11-year-olds. He said he wants "to bring the facts to the fingertips of the people who have got most to gain by finding [climate change] solutions in time."

Last Friday, Mr Juniper went to an event at Buckingham Palace in London. Charles hosted the event. He invited many business leaders. He asked them to help protect biodiversity. At the palace get-together, Juniper spoke about how excited Charles is that children want to help Earth. He said: "I think he's been struck by the level of energy and passion shown by young people on these subjects. He is keen to put something into their hands which is about basic ideas." King Charles wrote: "Ever since I was a young teenager, I have been deeply worried about the way we have shaped our world. I am pleased to see that children across the world are now raising the alarm and calling for big changes."
