**Students using A.I. over humans to learn English – 23rd December 2024**

## Level 4

Many students in Japan are using AI to learn English. The language-learning app Duolingo conducted a survey on studying languages. Students answered questions about their learning habits. The number of people using AI increased by more than 80 per cent in 2024. AI was most popular with younger people, who used AI more than face-to-face lessons. However, some people in their 20s were not totally happy with AI. They said it lacked natural responses.

Duolingo said: "We're in the midst of an AI revolution". It said apps were the most popular way to learn languages. This was followed by streaming services like YouTube and Netflix, then textbooks and then online lessons. The number of students going to language schools is decreasing. Just 14 per cent of people went to these. English was the most popular language. People also studied Korean, to understand their favourite artists and celebrities.

## Level 5

Many students in Japan are using AI to learn English and other languages. The language-learning app Duolingo conducted a survey on studying languages. More than 4,700 students answered questions about their learning habits. The survey found that the number of people using AI tools increased by more than 80 per cent in 2024. AI was particularly popular with younger people. More young people used AI than took face-to-face lessons. However, some people in their 20s were not totally happy with AI. They said it lacked natural responses and was a little boring.

Duolingo said: "We're in the midst of an AI revolution". It said apps were the most popular way to learn languages. Around 58 per cent of people who took the survey used language-learning apps. This was followed by streaming services like YouTube and Netflix, then textbooks and then online lessons. The number of people going to language schools is decreasing. Just 14 per cent of people went to classes with a teacher. English was the most popular language. People also studied Korean, to understand their favourite artists and celebrities.

## Level 6

More and more students in Japan are using artificial intelligence (AI) to learn English and other languages. The language-learning app Duolingo conducted a survey on how students study languages. More than 4,700 Japanese students answered questions about their language-learning habits. The survey found that the number of people using ChatGPT and other AI tools increased by more than 80 per cent in 2024. AI was particularly popular with younger people. The researchers said more young people used AI than took face-to-face lessons. However, some people in their 20s were not totally happy with AI lessons. They said AI lacked natural responses and was a little boring.

Duolingo said: "We're in the midst of an AI revolution....Technology has long had an impact on language learning." It found that apps were the most popular method in Japan to learn languages. English was the most studied language, followed by Korean. People are studying Korean "to understand the language as spoken by...favourite artists and celebrities."
