New Netflix show 'The Dinosaurs' getting top marks – 12th March 2026

Level 0

A new series scored 100 per cent on a review site. It is a four-part show called The Dinosaurs. Director Steven Spielberg is the executive producer. Fifty experts on prehistory helped to create what Earth looked like 235 million years ago. We can see how the dinosaurs developed, survived, and became extinct.

The designers used CGI to create the ancient continent of Pangea. They also made volcanoes, floods, and the dinosaurs. The series starts with the birth of the dinosaurs. It ends with the T. rex. An actor said this is the most iconic dinosaur of all time". We also see the asteroid that killed off the dinosaurs.

Level 1

A new series scored 100 per cent on a review site and is at number one on Netflix. It is a four-part documentary called The Dinosaurs. Actor Morgan Freeman narrated it. Director Steven Spielberg is the executive producer. He used 50 experts on prehistory to help make the show. They recreated what life on Earth looked like 235 million years ago. The series shows us how the earliest dinosaurs developed, survived for millions of years, and became extinct.

The designers used CGI to create the ancient continent of Pangea. This was a giant land mass that slowly broke up to make the continents of today. The designers also made volcanoes, floods, and the dinosaurs. The series starts with the birth of the dinosaurs. It ends with the enormous T. rex. Freeman calls this "the most iconic dinosaur of all time". It also shows the asteroid impact that killed off the dinosaurs.

Level 2

A new series has scored 100 per cent on a review site and is at number one on Netflix. The mini-series is a four-episode documentary called The Dinosaurs. Superstar actor Morgan Freeman narrated it. Legendary director Steven Spielberg is the executive producer. He also directed the movie Jurassic Park. He used 50 experts on prehistory to help make the show. They recreated what life on Earth looked like 235 million years ago. The four episodes show how the earliest dinosaurs developed, survived for millions of years, and became extinct.

The producers used CGI to create the dinosaurs. CGI designers recreated the ancient supercontinent of Pangea. This was a single land mass that slowly broke up to form the continents of today. The designers also made volcanoes, sand storms, floods, old forests, and the dinosaurs. The series starts with the birth of tiny dinosaurs. It ends with the enormous T. rex. Freeman says these are "the most iconic dinosaurs of all time". It also shows us the asteroid impact that killed off the dinosaurs. A newspaper said, "the geology and meteorology are powerfully made".

Level 3

A new series has scored 100 per cent on the review site Rotten Tomatoes and is at number one on Netflix. The mini-series is a four-episode Netflix documentary. It is called The Dinosaurs. It has powerful figures from Hollywood behind it. Superstar actor Morgan Freeman narrated it. Legendary director Steven Spielberg is the executive producer. He also directed the blockbuster movie Jurassic Park. Mr Spielberg used 50 experts on prehistory to help make the show. They recreated what life on Earth looked like between 235 million and 66 million years ago. The four episodes document how the earliest dinosaurs developed, survived for millions of years, and became extinct.

The producers used CGI to create the landscapes and dinosaurs. CGI designers recreated the ancient supercontinent of Pangea. This was a single land mass that slowly broke apart over tens of millions of years to form the continents of today. The designers also made volcanic eruptions, sand storms, floods, million-year-old forests, and (of course) the dinosaurs. The series starts with the birth of tiny dinosaurs. It ends with the enormous T. rex and triceratops, which Freeman says are "the most iconic dinosaurs of all time". It also shows us the asteroid impact event that killed off the dinosaurs. The Guardian newspaper reviewed the series. It said, "the geology and meteorology are powerfully rendered".
